

Pavillon Toscana

[Oasis in the garden]

Caravita - Pavilions, are a piece of garden tradition - idyllic places for relaxed hours. A fruity red wine on a mild summer evening, switching off from the daily routine. A conversation among friends - people come closer to one another where the pavilion "Toscana" stands.

"Toscana" offers plenty of space for cosiness, dreamy hours and summer parties.

For fixed installation
and mobile use

CARAVITA®

A pavilion for many occasions

With "Toscana", you are free to design your garden setting, because "Toscana" is not only designed as a fixed installation but also as a mobile pavilion. Sometimes with rose-covered foliage by an idyllic pond, sometimes freestanding at home - experience your garden from new perspectives, time after time.

"Toscana" can be effortlessly set up and dismantled and can be made light and small for transportation - also ideal for use in gastronomy and in commercial presentations.

A cool place for warm buffets at parties - pavilion "Toscana" in anthracite with decorative flounce.

The robust aluminium construction

High-quality materials and perfect craftsmanship guarantee a long useful life. The trellis grill and roof struts are manufactured from corrosion-free, thick-walled aluminium profiles. Painted in elegant anthracite or classic white, as you wish. We provide a 10-year guarantee for the robust construction.

The weatherproof canopy

The acrylic awning fabric is absolutely weatherproof and is extremely colour-fast. The range of fabrics comprises over 75 attractive colours and enables you to design your pavilion individually (for variations see Caravita main catalogue). The roof canopy is also available with a decorative flounce upon request.

Thanks to the unique Cleanguard impregnation technology, the canopy defies wind and weather.

The protective wind roof

"Toscana" is also available with a practical wind roof. This reduces the area that can be attacked by the wind and improves air circulation under the roof on hot, windless days.

The atmospheric lighting set

The "Summertime" light set immerses the pavilion in pleasant light. With 3 bright light-bulbs made of matt acryl resin (3 x 40W). The set is simply clamped onto the round central beam. It can also be used for parasols.

The best qualities of fabric ensure that the roof cover sits perfectly.

Appealing appearance - the characteristic wind roof.

Available Sizes

- 3 x 3m
- 3.5 x 3.5m
- 4 x 4m
